### FAQS

What applications are GF 260 good for?	GF 260 works great with flat, smooth transparent surfaces. An ideal solution for temporary store front applications and medium-term applications requiring view-through capabilities and bond to windows.
What if I leave GF 260 on past it's optimal removability time frame?	GF 260 will always be removable, but you may have some percentage of adhesive transfer when left on past the 1 year clean removal timeline.
Is GF 260 good for vehicle windows?	When this product is used on vehicles some states have minimum light transmission regulations. The user of this product is responsible for complying with these regulations.
If I want to laminate my graphic print, do I need to use an optically clear laminate?	Yes. In most cases where a laminate is used, an optically clear laminate is recommended for optimal view-through capabilities. Using standard laminates can result in less clarity. We recommend our GF 842 Opti-Mark™ Optically Clear Cast laminate.
